

AI ESSENTIALS FOR DOCTORS: DEMYSTIFYING TECHNOLOGY

BOOK ON EVENTBRITE

 Who's it for

SAS, LED

This hands-on workshop introduces doctors to artificial intelligence (AI), including generative AI tools. Participants will explore AI's principles and practical applications in healthcare, learning how to critically assess its impact and develop foundational skills for using generative AI to enhance efficiency, patient care, and professional development.

Doctors will gain a clear understanding of AI concepts and practical skills to use generative AI tools effectively. The workshop will cover real-world applications, ethical considerations, and strategies for integrating AI into clinical workflows, aligning with the evolving landscape of healthcare innovation.
