Inspire - Create - Lead

AI and leadership - harnessing technology without losing the human touch

Susie Edwards, Director

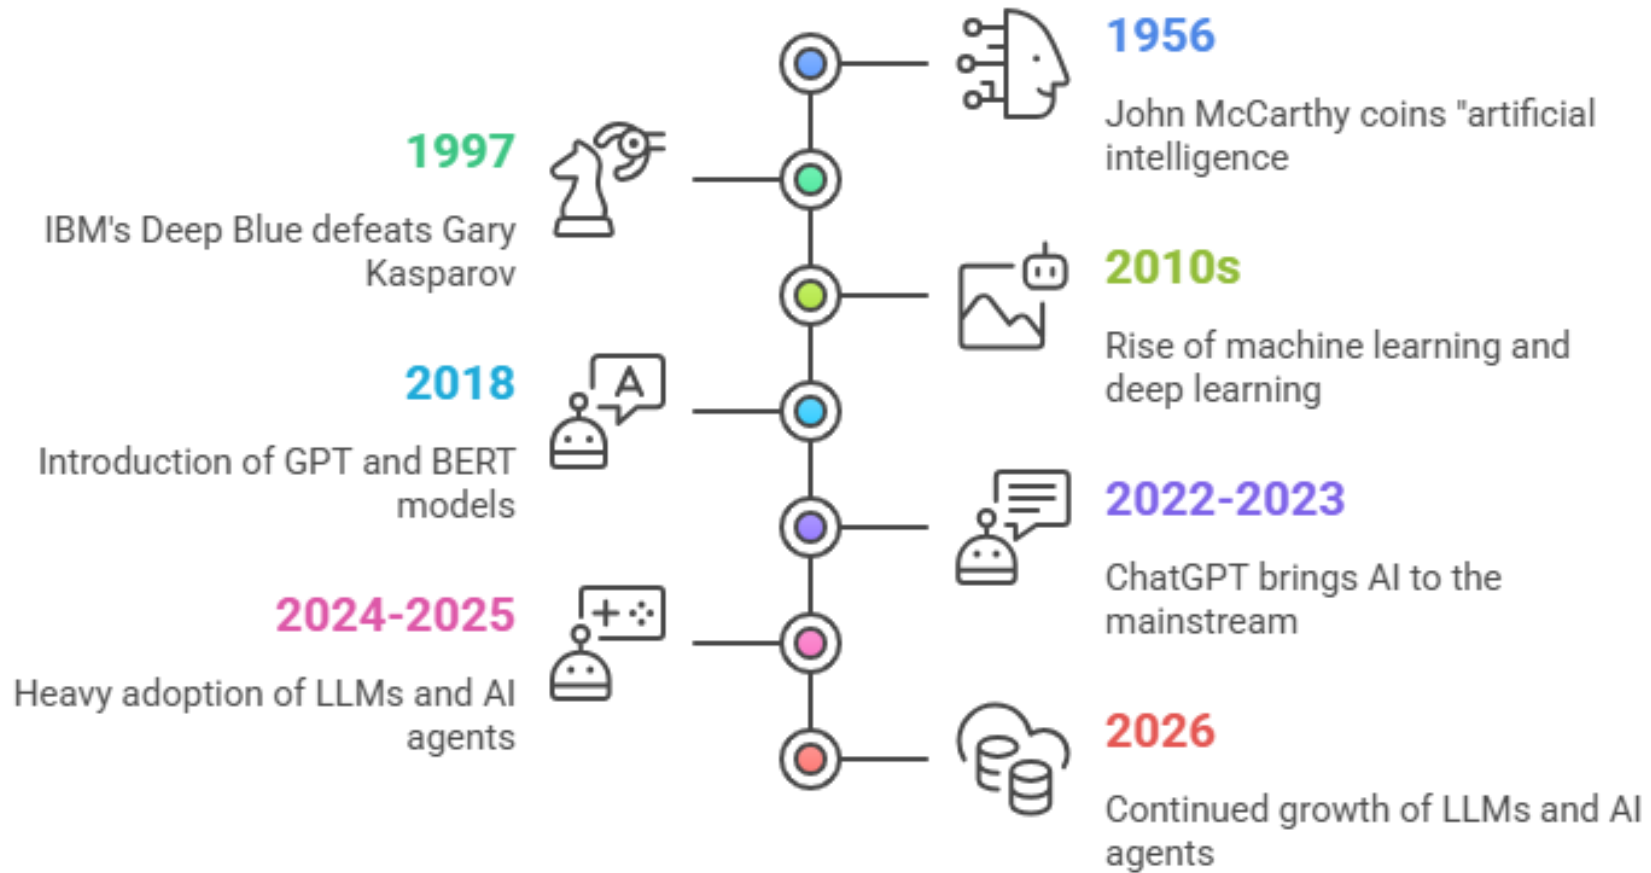

www.wonderif.co.uk

Learning outcomes

- Understand more about how you are using AI and share best practice with each other
- Explore strategies to balance AI adoption with human-centred leadership
- Identify practical AI tools that may enhance efficiency and innovation

How are you using AI?

Teams matter

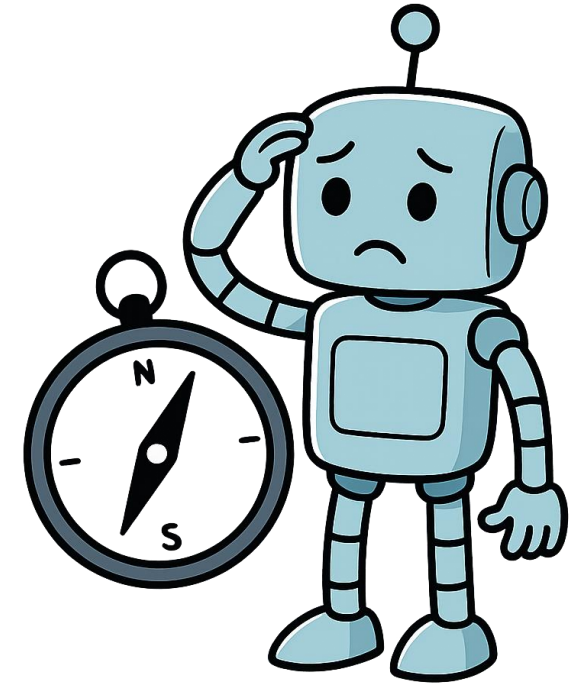

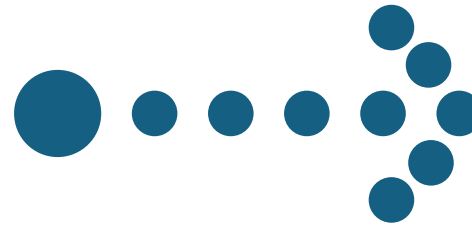

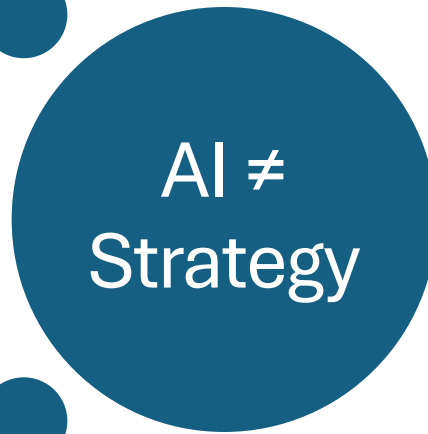

Teams set the direction & drive

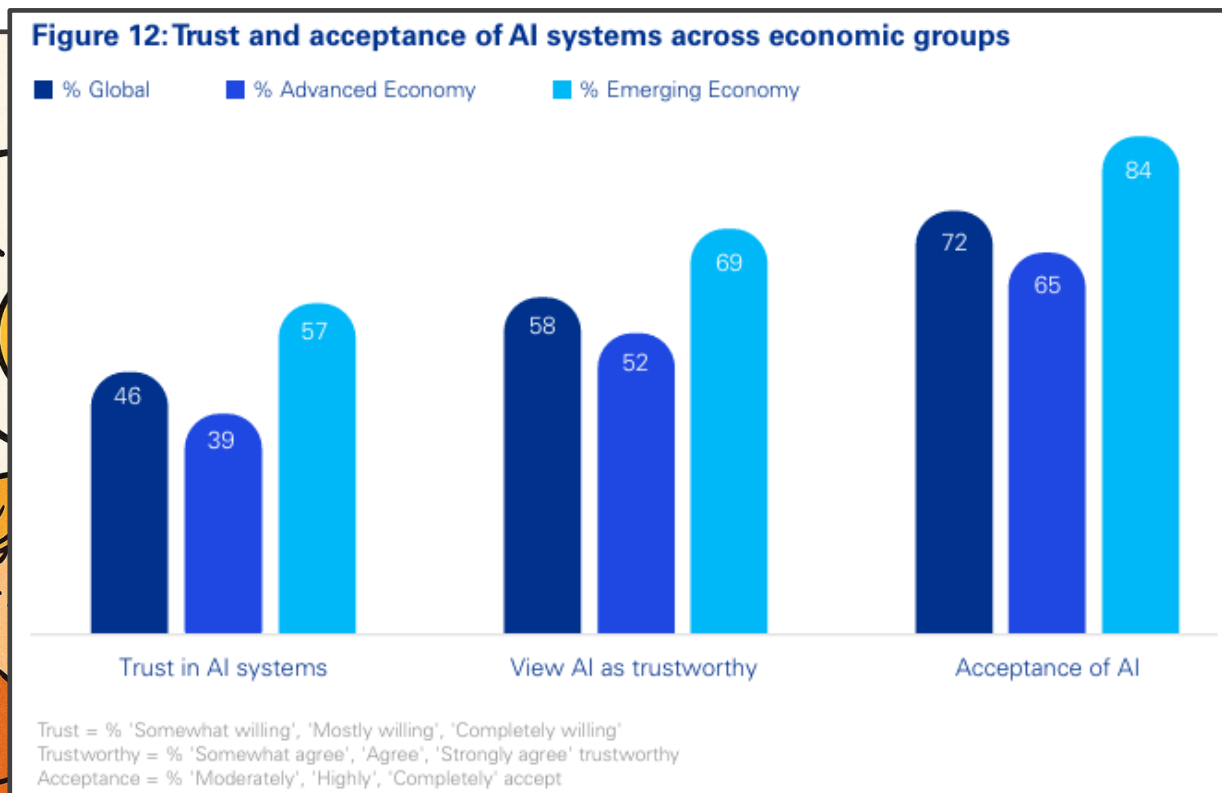

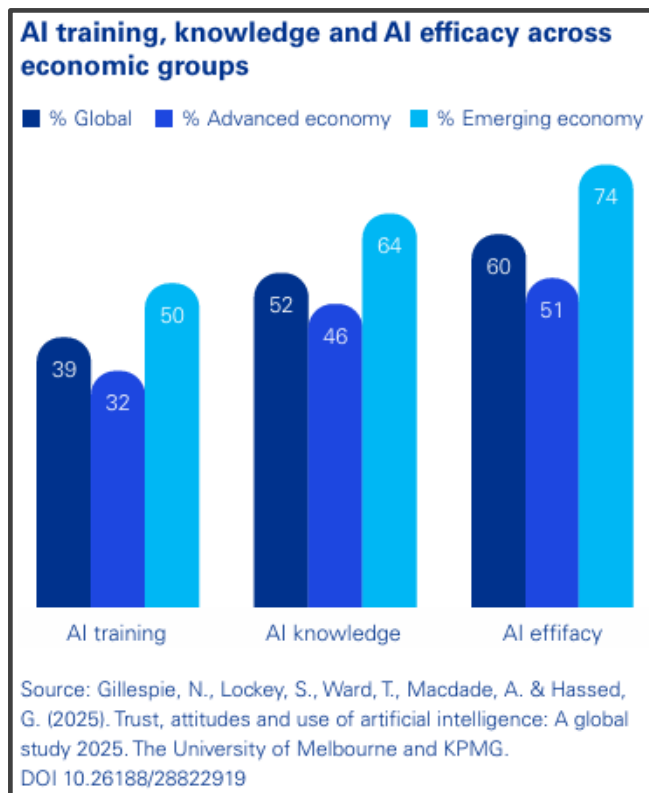

People do what AI can't

ROI lives in the team

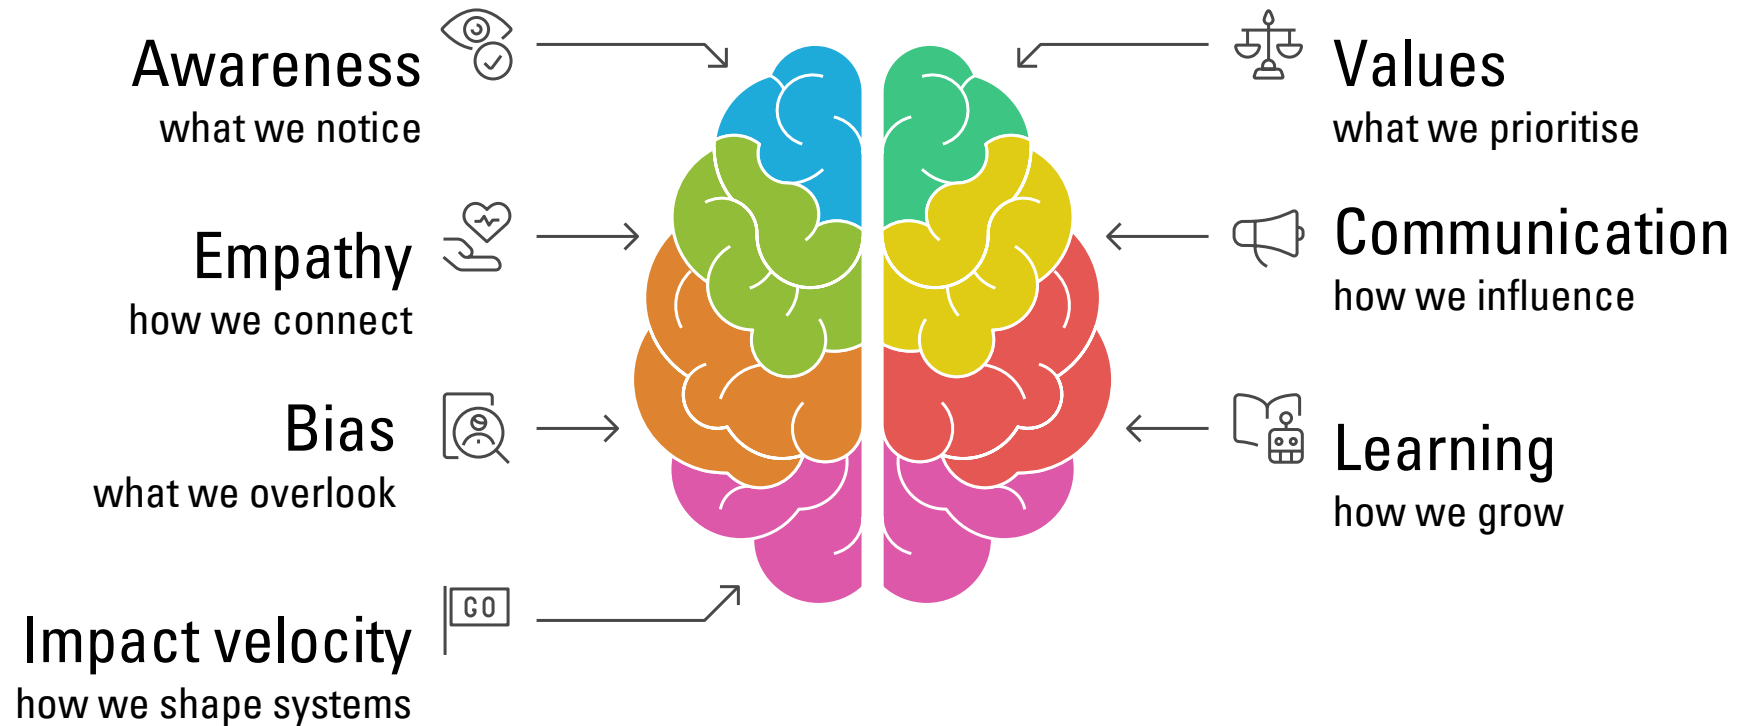

How is your team feeling about AI?

AI as an amplifier in leadership

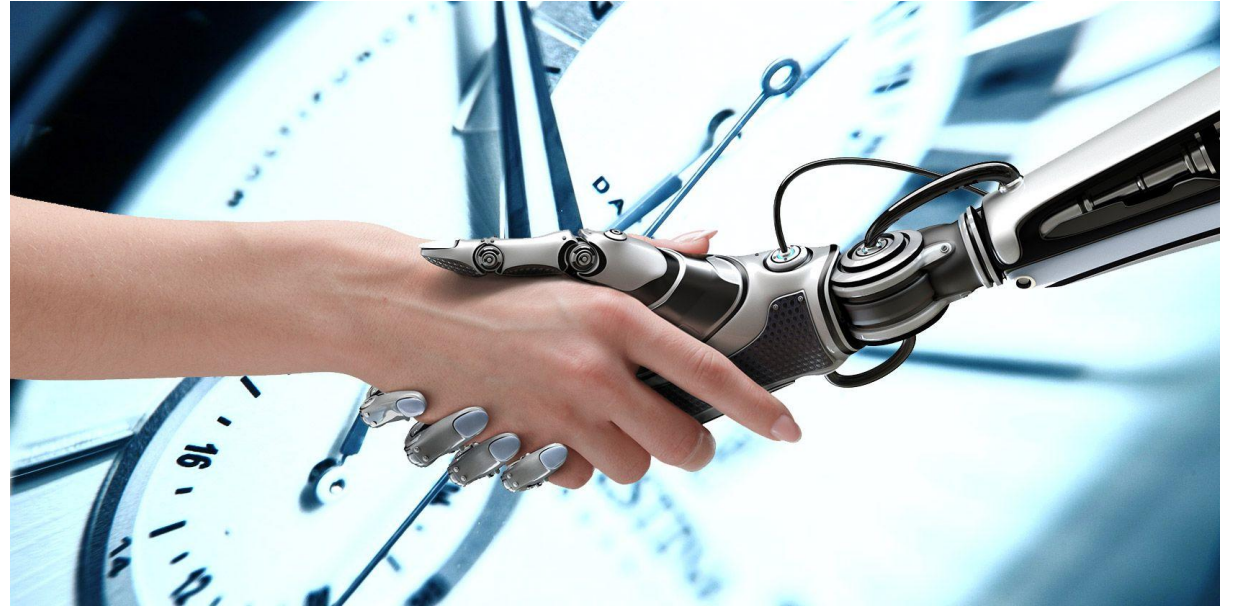

WonderIf

Inspire - Create - Lead

Staying in charge of the thinking

AI **may** save us time.

Inspire - Create - Lead

Workslop

Workslop spreads when AI becomes a crutch instead of a tool for collaboration.

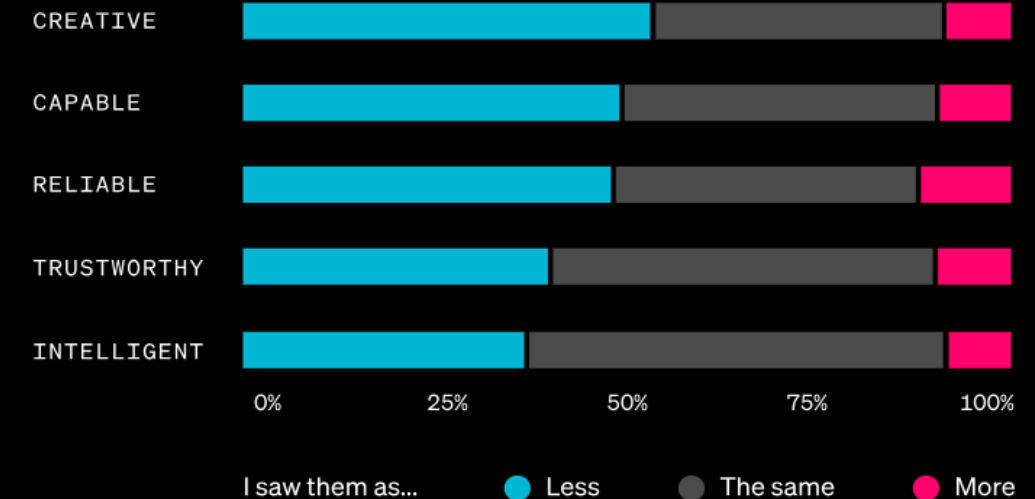

Individuals: feel frustrated, confused and disengaged.

Teams: waste cycles, duplicate efforts, and lose trust.

Organizations: lose time, are misled by false productivity and experience stalled AI adoption.

Receiving workslop negatively impacts our relationships and changes perceptions of colleagues.

How did receiving this work change your perception of your colleague?

AI in your team(s)

Collaborative tool

Establish shared norms for how and why we use AI

What does good use of AI look like in our work?
Where could AI accelerate meaningful work not simply to make it faster?

We use AI to...

We never use AI to...

We always apply human review when..

Maintaining standards of excellence

AI-augmented work must meet or exceed human standards of quality, ethics, and professionalism

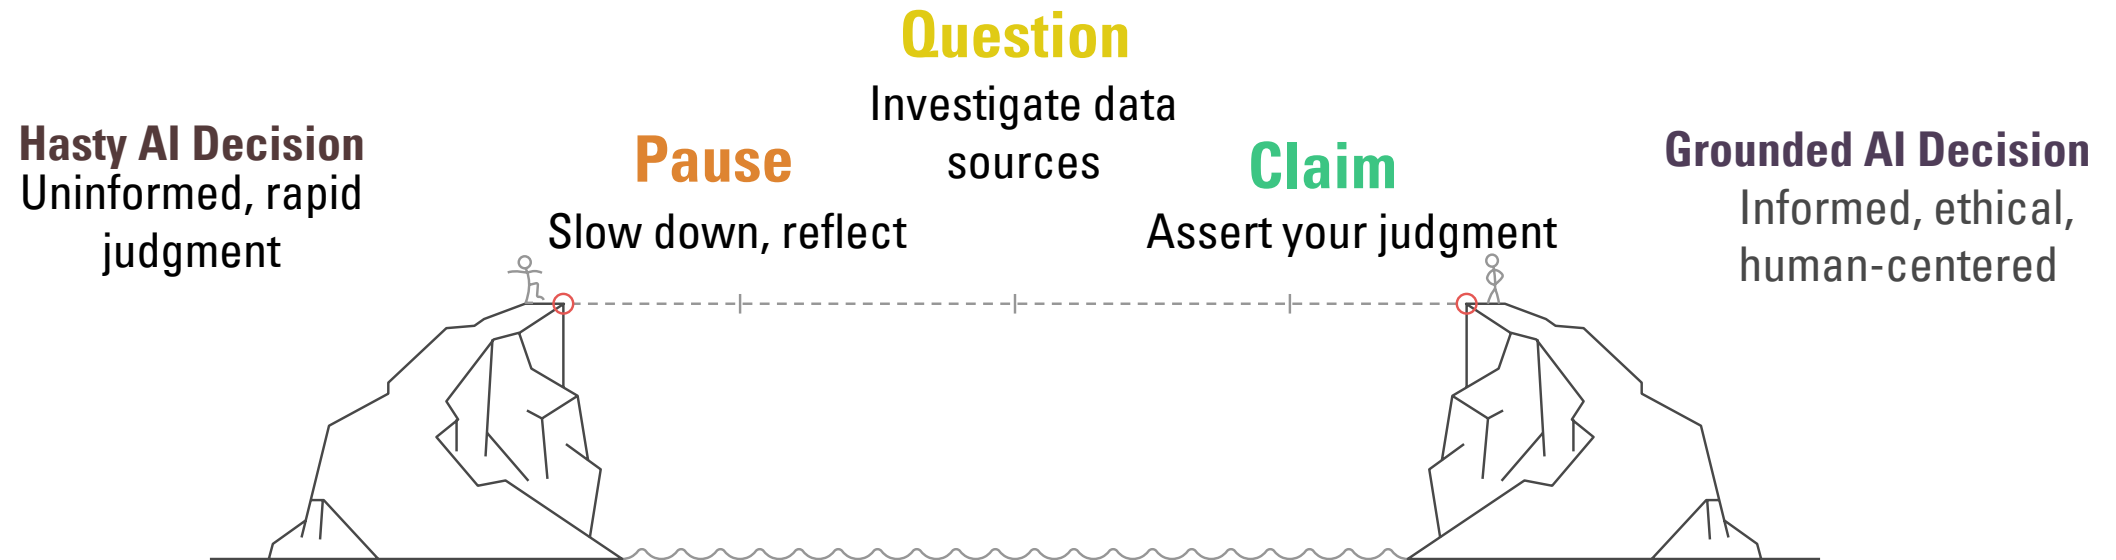

Does this reflect our usual tone, accuracy, and rigor?

Would I be confident presenting this as my own?

Have I critically reviewed, not just edited, AI's work?

Does this contribute to learning and improvement for others?

AI leadership anchors
