

Compatibility Documentation

Browsers

We recommend browsing on the new site in **Google Chrome**, which should already be installed on your system.

Internet Explorer will also be on your machine, but there will be compatibility issues if you're using a version **earlier than Internet Explorer 9**.

On **Internet Explorer 8** there will minor issues such as no rounded borders and the page won't adapt to the window size. However, on versions **Internet Explorer 7 and earlier** the website will **not be functional**.
