Advance Care Planning in Paediatrics
Educational Day & Communication Skills Workshop
3rd May 2018
Norfolk and Norwich University Hospital NHS FT, Norwich, NR4 7UY

Advances in medical science and technology means that more and more children with life-limiting are living longer. However, children with life-limiting conditions frequently undergo inappropriate and unnecessary interventions and/or do not receive the palliative care support they need due to the lack of advance care planning. It is important that paediatricians are equipped to initiate advance care planning discussions with families early on. We are delighted to offer this educational day and workshop to trainees and consultant paediatricians in the East of England.

This educational day comprises two parts:
1. A morning of talks and case presentations on ethical and communication challenges in advance care planning: free and open to all.
2. The afternoon will be a communication skills workshop, limited to 20 participants (paediatric trainees and consultants only), on a first-come, first-serve basis.

The faculty will include prominent national figures in children’s palliative care and medical ethics:
Dr Richard Hain, Consultant and Lead Clinician, Paediatric Palliative Care
Children’s Hospital, Cardiff CF14 4XN
Visiting Professor, University of South Wales

Dr Finella Craig, Consultant in Paediatric Palliative Medicine,
Great Ormond Street Hospital, London

Dr Pat Sartori, Consultant in Paediatric Palliative Medicine
Cambridge University Hospital, Cambridge

Dr Linda Maynard, Nurse Consultant
East Anglia Children’s Hospices

Please contact me if you wish to attend the afternoon workshop.
