PANEA regional update days are held twice yearly for healthcare professionals who may see, manage or refer children with asthma or allergic conditions in their routine practice.

The objectives of these meetings are to:

- 1. Help disseminate and improve the knowledge and awareness of common allergic disorders (including food allergies, asthma and anaphylaxis) in infancy and childhood for healthcare professionals working in primary care or hospital settings*
- 2. Raise awareness in healthcare providers of the impact of allergic disease on the quality of life of children and their families and help raise the standards of care provided for them across the region*
- 3. Help maintain awareness of national and regional guidelines for children for the care, diagnosis and management of children with allergic diseases and/or asthma*
- 4. Raise awareness of advances in diagnostic techniques and appropriate care and treatment of allergic conditions in infants and children*
- 5. Update healthcare professionals on scientific and technological advances in allergy*
- 6. Provide attendees the opportunity to meet with and discuss their practice with regional and national specialists in the fields of paediatric allergy and/or asthma*
