

enhance experiences

Trainee Guide 2023-2024

Enhance Experiences

Bespoke opportunities to experience an area of interest.

Much of the learning from the Enhance Explore (doctors) and Engage (pharmacists) programmes will come from spontaneous opportunities in your placement settings, online educational content and attendance at domain-based hub days.

You are however encouraged to undertake deeper learning in areas of particular interest through your **Enhance Experiences**. They should:

- Provide you with a unique experience and perspective on the “bigger picture” of our healthcare system
- Help prepare you to be a leader of the future.
- Be organised with the support of local supervisors and the regional Enhance team and
- Be spread through the F2 year (explore pathway) or alongside your foundation training (engage pathway).

You are encouraged to identify areas you would like to focus on, preferably early in your training, so that placements and experiences can be supported by the Enhance team i.e. with making appropriate contacts.

If you are on the explore pathway (doctors), the time for Enhance experiences will come from study leave allowance (those on the explore pathway will not need to use study leave to attend Enhance hub days).

If you are on the engage pathway (pharmacists, dentists, PAs), please discuss with your supervisor/facilitator what arrangements can be made for you locally. Please liaise with the Enhance team if you require any support.

Please liaise with the Enhance team if you require any support
enhance.eoe@hee.nhs.uk.

Arranging Enhance Experiences

Practical application of experiences

To support with your experience day opportunities, the Enhance team have contacted a range of departments, specialities and organisations that are prepared to offer Enhance Experiences to you.

Opportunities are available at a local and regional level (if you are willing and able to travel).

Below you will find a list of potential opportunities with contact information.

Please note that this document will be updated as more opportunities are offered, so it is worth reviewing periodically.

How to organise your experience

- Contact the provider of the Enhance Experience to be able to set a date and alternative dates.
- Liaise directly with your supervisor(s) and rota coordinators (if applicable), and complete a study leave request.
- Confirm with the Enhance Experience provider when that study leave request has been approved and they can expect your attendance.
- Please download and take a REAL form with you, to be completed on the day of your experience and uploaded to the eportfolio.
- You must check with your FTPD team (for doctors, dentists and physician associates) and Training Managers (for pharmacists) that you will be indemnified and appropriately supervised during an Enhance Experience. This is particularly important in any non-NHS site.
- Some of the experience providers require honorary contracts, so you must ensure you have completed these, and understand the limits of your participation in external site interactions.

Please note that some opportunities have limited capacity and therefore will be offered on a first come first served basis, so do be proactive in contacting our partners.

Alternative Enhance Experiences

You may also contact other services/departments that are not in this list.

Please discuss any interests with your supervisor who may also be able to support you with making appropriate local links.

If you are afforded an opportunity locally that might benefit future learners, then please let us know so that others might benefit from what you've organised too.

Experience practicalities

Ensure you know who you are meeting and when.

Ensure that you agree your learning objectives.

- you are encouraged to discuss these first with your supervisor(s) to ensure that these experiences are meaningful.
- In some cases, suggested learning outcomes are also included below.
- You may also have your own learning outcomes you wish to achieve.

During your experiences you are encouraged to meet team members, speak with service users, and get involved as much as you can. You should also think about how your experience aligns with the Enhance domains and themes. As an activist and leader of the future you are encouraged to reflect on these experiences and consider what you have learned and how your insight could be used to benefit of our health and social care system.

Complete a debrief at the end of your experience, and complete a REAL form

The enhance team would welcome your feedback on experiences you have undertaken: enhance.eoe@hee.nhs.uk.

Enhance Experiences

experiences available in NHS services
locally within your Trust / ICS area

Chaplaincy

Suggested learning outcomes

- Understand the role of Hospital Chaplaincy
- Observe the chaplains at work
- To learn how chaplains identify, assess, and manage spiritual, religious, and cultural needs
- To identify who would benefit from referral to hospital chaplaincy and the importance of patient consent
- To learn about the potential chaplaincy role in care of the dying
- To learn about the possible chaplaincy role in baby loss
- To learn about support the chaplains offer to hospital staff

ICS/ICB/ICP Opportunities

Mid and South Essex ICS

Opportunity Description	Contact
<p>The MSE Stewardship programme is an opportunity for trainees to engage with real, practical system leadership. They will each spend time with one of our Stewardship teams, which bring together clinical and frontline managers within different care areas (e.g. Ageing Well, Cancer, Stroke and Urgent and Emergency Care) to act as stewards of our health and care system's resources. Stewards use their pooled experience from across whole pathways, along with integrated population data to improve decision-making at system level, through both longer-term strategic work and shorter-term improvement initiatives</p>	<p>Dr Peter Scolding, Assistant Medical Director Mid and South Essex Integrated Care System</p> <p>Peter.scolding@nhs.net</p>
