

NEWCASTLE ENT SIMULATION BOOT CAMP

Date: 17th & 18th October 2017

NEWCASTLE SURGICAL TRAINING CENTRE,
FREEMAN HOSPITAL

The Newcastle ENT Simulation Boot Camp is designed to provide trainees with a basic skills set required to facilitate their entry into higher surgical training. The course will employ a series of technical and non-technical human factors simulation to guide trainees through different aspects and expectations of their training.

CONTENT AND DELIVERY

The programme is based on trainees rotating through specifically designed skill stations over 2 days. These will be interspersed by a few short didactic lectures.

- Managing a theatre environment
- Airway emergency in resuscitation
- Simulated Ward round
- Facial plastics – suturing, basic flap design and drain insertion
- Paediatrics – familiarization of paediatric airway equipment and practice on model PESCC/MAST doctrine
- Laryngology – familiarization of microlaryngeal/pharyngoscopy instruments
- Otology – Voxelmann TB Simulator/Temporal Bone, Setting up an operating microscope, setting up facial nerve monitor
- Rhinology – FESS simulation, CT interpretation
- Training Progression – Learning agreement, ARCP, Research

OBJECTIVES

- To provide new trainees with the basic skill set required to facilitate their entry into higher surgical training.
- To allay some of the anxieties that beset trainees during this transition within a safe simulated environment.
- This course will employ a series of technical and non-technical human factors simulation to guide trainees through different aspects and expectations of their training alongside didactic lectures.
