

## **Fellowship at the Royal Marsden**

We are aware of our increasing dependence on IT and Electronic Patient Records for smooth and efficient running of healthcare systems. With this in mind we have set up a unique “Health Informatics and Anaesthesia Fellowship” open to any post-FRCA trainee anaesthetist with a strong background interest in IT systems. The successful applicant would be part of the clinical leadership team involved in developing and delivering a new IT strategy within the trust. In addition they would have the opportunity to further their experience in major cancer anaesthesia. There is also the possibility of enrolling on the postgraduate Health Informatics certificate course at UCL, if the applicant was keen, for which some funding will be available.

Anyone interested in the role should email Dr Tim Wigmore (Head of CCU and Chief Clinical Information Officer) – [timothy.wigmore@rmh.nhs.uk](mailto:timothy.wigmore@rmh.nhs.uk), or Dr Susanna Walker (Fellowships Coordinator) – [fellowships@rmh.nhs.uk](mailto:fellowships@rmh.nhs.uk). Further information can be found on our website (<https://www.royalmarsden.nhs.uk/fellowships>).
