

Complications, Disasters, And Aftermath

Doctors Forum UK committee invites you to attend unique meeting on

Thu Nov 9th 2017

Venue: AAGBI, London, UK

Nothing prepares you for a disaster following a procedure or surgery. Your despair about your career, future, other patients, and family. Your training, education, and experience does not quite prepare you for such a situation. The looming consequence of GMC investigations and licence withdrawal, patients' complaints and bad press can affect your practice and career.

We have gathered a unique national meeting where you will hear from speakers and their thoughts. We have eminent speakers who will share their experience and wisdom. These interactive sessions promise to be interesting and educative, for all of us who tread this difficult path.
