Health Education East of England GMC National
Training Survey Analysis 2015: Trust Report

**Hinchingbrooke
Health Care
NHS Trust**

Narrative

Trust Indicators

The dashboard for the Hinchingsbrooke Health Care NHS Trust illustrates where it stands relative to the national mean and the other trusts nationally participating in the National Training Survey (NTS). Twelve of the 14 indicators lie in the first quartile, two in the second and none in the third or fourth quartiles.

The chart illustrating the means by indicator from 2012 to 2015 shows that the indicators have in general stayed about the same. Hinchingsbrooke's Means by Indicator chart for 2014 and 2015 compared to the 2015 national mean illustrates that almost all indicators are below the national mean and down on last year.

Programme Group Indicators

The chart for Overall Satisfaction for each programme group illustrates where Hinchingsbrooke's programme groups lie relative to each programme group's national mean. The quartiles were calculated for each programme group using the means of each trust participating in the NTS that runs that particular programme group. Hinchingsbrooke has five programme groups in the first quartile, two in the second, one in the third quartile and two in the fourth quartile. Hinchingsbrooke is in the bottom 25% of trusts which run the programme groups in quartile one while it is in the top 25% of trusts which run each of the programme groups which lie in quartile four.

Outliers

The outliers by programme group and level show which areas are above (green/A) and below (red/B) outliers. A programme group is an outlier if it is in the top or bottom of the GMC calculated quartiles and the confidence intervals do not overlap those of the national mean.

The GP Programme for Obstetrics and Gynaecology has the most negative outliers with three, while the GP Programme for Medicine has the most positive outliers with two.

The chart of net programme group outliers for 2012-2015 illustrates the net outliers for each programme group by trust, with positive outliers getting value +1 and negative outliers getting value -1. Hinchingsbrooke had a net outlier value of 10 in 2012, 10 in 2013, 2 in 2014 and -4 in 2015.

Rankings

The rankings chart shows where Hinchingsbrooke comes in comparison to the other trusts delivering each of its programme groups for Overall Satisfaction. The graph is calculated by dividing by the total number of trusts who reported information for that programme group in order to be able to directly compare each programme group, no matter how many trusts deliver it. Hinchingsbrooke has one programme group which has remained in the bottom quartile for the last 3 years, Medicine F1. Obstetrics and Gynaecology has remained in the top quartile for the last three years and from 2013 to 2015 Emergency Medicine F2 and General Practice F2 have moved from the top quartile to the bottom quartile.

Patient Safety Concerns

Hinchingsbrooke has six patient safety concerns, two of which are in workload. Hinchingsbrooke is in the upper range for concerns per bed and this is up from 2013 and 2014.

Dashboard

Quartile	Indicator	Hinchingsbrooke Mean	National Mean
Quartile 1	Access to Educational Resources	68.39	69.24
	Adequate Experience	79.87	82.14
	Clinical Supervision	85.33	89.19
	Clinical Supervision out of hours	83.64	88.44
	Feedback	67.12	77.01
	Induction	81.67	85.33
	Local Teaching	58.46	63.9
	Overall Satisfaction	77.14	81.74
	Regional Teaching	67.99	70.98
	Study Leave	66.93	70.17
	Supportive environment	75.26	76.14
	Work Load	46.18	47.25
Quartile 2	Educational Supervision	89.18	89.82
	Handover	69.25	69.67
Quartile 3			
Quartile 4			

The quartiles are calculated from the means for every trust that participated in the National Training Survey (NTS). The quartiles for each indicator are calculated separately. Therefore if a trust's indicator fell within the first quartile, then this means that the trust fell within the bottom 25% of trusts for that indicator. If a trust fell within the fourth quartile, then this means that the trust fell within the top 25% of trusts for that indicator.

Trend Data

Indicator	2015 National Mean	2015 Trust Mean	2014 Trust Mean	(2015 Trust Mean) - (2015 National Mean)	(2015 Trust Mean) - (2014 Trust Mean)
Access to Educational Resources	69.24	68.39	67.82	-0.85	0.57
Adequate Experience	82.14	79.87	79.87	-2.27	0
Clinical Supervision	89.19	85.33	86.66	-3.86	-1.33
Educational Supervision	89.82	89.18	89.47	-0.64	-0.29
Feedback	77.01	67.12	68.94	-9.89	-1.82
Handover	69.67	69.25	71.25	-0.42	-2
Induction	85.33	81.67	86.64	-3.66	-4.97
Local Teaching	63.9	58.46	55.74	-5.44	2.72
Overall Satisfaction	81.74	77.14	76.95	-4.6	0.19
Regional Teaching	70.98	67.99	71.22	-2.99	-3.23
Study Leave	70.17	66.93	67.01	-3.24	-0.08
Work Load	47.25	46.18	47.2	-1.07	-1.02

Overall Satisfaction by Programme Group

Programme Groups by Quartile

Quartiles	Programme Group	Hinchingbrooke Mean	National Mean
Quartile 1	Emergency Medicine F2	73	80.57
	GP Prog - Obstetrics and Gynaecology	59	77.89
	General Practice F2	82	80.57
	Medicine F1	76.36	77.14
	Surgery F2	67.43	80.57
Quartile 2	CMT	76	76.35
	GP Prog - Emergency Medicine	79.2	77.89
Quartile 3	GP Prog - Medicine	79	77.89
Quartile 4	Obstetrics and gynaecology	89.6	79.96
	Surgery F1	77.78	77.14

Quartiles are calculated from the means for every trust that ran that programme group. The quartiles for each programme group are calculated separately. Therefore if a trust's speciality falls into the first quartile this means this speciality had an overall satisfaction mean that fell within the bottom 25% of trusts in the UK running this speciality.

Programme Groups by Level

Level	Programme Group	Hinchingbrooke Mean	National Mean
FY1	Medicine F1	76.36	77.14
	Surgery F1	77.78	77.14
FY2	Emergency Medicine F2	73.00	80.57
	General Practice F2	82.00	80.57
	Surgery F2	67.43	80.57
Core	CMT	76.00	76.35
	GP Prog - Emergency Medicine	79.20	77.89
GP Prog	GP Prog - Medicine	79.00	77.89
	GP Prog - Obstetrics and Gynaecology	59.00	77.89
Run-Through Training	Obstetrics and gynaecology	89.60	79.96

Total													12	8	5	2	6	9

This table represents the outliers for the last three years. A place is coloured if it is an above (Green) or below (Red) outlier in 2015. If an outlier in 2015 was not an outlier in either 2014 or 2013 then it is left as a pale colour and with nothing written in it. However if the outlier in 2015 has been an outlier multiple times over the last three years then the number of times it has been a positive or negative outlier is written in its box and the colour of the box is darkened correspondingly. This is useful for seeing where continuous issues or positive areas lie for each programme group.

On the right hand side of the table is a count of how many outliers there were for each programme group in each of the years. This can be used to see if programme groups are in general improving or getting worse.

The red and green arrows on the bottom left hand side represent whether the total number of positive and negative outliers has improved from 2014 to 2015.

Net Programme Group Outliers

Each net programme group outlier is calculated by taking away the number of below outliers from the number of above outliers occurring across all programme groups for that trust in that year. Each trust has had their net outlier figure calculated for the last four years, permitting us to see the general trend for each trust and each workforce partnership.

Programme Group Overall Satisfaction Rankings

Trust Ranking
Total Number of Trusts Nationally Reporting for this Programme Group

Trust ranking of each Programme Group for 2013-2015 is calculated by ordering the means of the Overall Satisfaction of all trusts reporting for that programme group with n>2 respondents. Quartiles have been calculated from means of the other trusts, meaning if a trust is in the top quartile then it is in the top 25% of trusts which deliver that programme group.

Patient Safety Concerns

These are the East of England Multiprofessional Deanery GMC NTS Patient Concerns for 2015 Collated by Local Education Provider (LEP) in March 2015. The data below has been broadly categorised to show the responses to the patient safety concerns question by LEP.

Areas of Concern identified	Understaffing	High Workload/ Work Intensity	Patient Care Provided incl assessment, treatment	Lack of Team work	Inadequate Handover	Capacity [shortage of Beds]	Confidence issues including lack of competence, induction; cross cover	Inadequate Supervision	Tension b/w education & service	Nursing Issues	Locum issues incl quality, availability	Clinical Processes incl equipment; IT	Intercultural communication issues incl lang	Non PSC - Ethical Issue	Total

Acute Trust Patient Safety Concerns per bed

2013-2015 Trend Data

2015 Data by Workforce Partnership

Calculation: (2015 Patient Safety Concerns / # beds in trust) / average all EoE acute trusts. Ranges are calculated using the standard deviation, centred around the target, 0. The number of beds is the overnight and day only bed numbers taken from NHS England at <http://www.england.nhs.uk/statistics/statistical-work-areas/bed-availability-and-occupancy/>, Q4 data of applicable financial year.
