

Bursary - Application Guidance

Master's in Medical Education – up to 60 credits to support application wanting to progress from PGDip to MSc in Medical Education

September 2024 Intake

NHSE EoE fund bursaries for postgraduate qualifications in medical education. These bursaries are open for applications in a competitive nature across NHSE EoE (please see attached essential and desirable characteristics and application forms for more information of your eligibility to apply).

In order to offer the bursaries in a fair and transparent manner we have adopted the following scoring and ranking systems.

Before you Apply

1. Ensure you read the following guidance document and the candidate specification and meet the eligibility criteria to apply for this bursary funding.
2. Ensure you have support from your University Tutor. A supporting statement must be submitted with your application form. Applications without a supporting letter will not be considered.
3. Ensure you have researched your chosen university course and understand and accept all conditions:
 - Course delivery; F2F, virtual or hybrid
 - Total course fee; Bursary funding is a maximum of £3500. Funding can only be spent on tuition fees, other costs associated with completing the course will not be covered by the funding.
 - Application process; University of Cambridge in particular has a very competitive and thorough application process. Bursary funding does not guarantee you a space on the course.
4. Contact your chosen university to confirm that they will honor the credits from your PGDip. You should only apply for a MSc if you have already completed a PGDip.

Application Process

1. Only applications submitted on the standard application proforma will be considered. Supplementary documents (i.e. CVs or references etc.) will not be considered.
2. Applications which exceed the word count will not be considered.
3. Only applications that fulfil the essential criteria will be forwarded for scoring (all others will not be considered).
4. The scoring system recognises clarity of application, evidence of reflection, personal development as an educator and contribution to the education of workers in healthcare (doctors, dentists, nurses, pharmacists, and allied healthcare professionals).

5. Retrospective applications or applications submitted outside of application windows will not be considered.
6. Bursary funding cannot be deferred or used in another academic year to support delayed study; applications are considered for specific intakes only.

Application Scoring

1. Applications will be scored independently by two separate individuals from a panel at NHSE EoE.
2. Marks will be allocated according to a pre-agreed scoring matrix.
3. Scores will be returned to an administrator who will calculate the total score.
4. In the case of a marked discrepancy between scores, individual cases will be re-marked, and any subsequent disputes will be adjudicated by a further panel member.
5. A pre-agreed threshold score will have been determined. This must be achieved to be awarded a bursary.
6. Bursaries will then be allocated as outlined in the 'places allocation explained' section below.

Financial costs to the individual applicant

The maximum amount of bursary funding is £3,500. Applicants should be aware that the cost of a Master's varies amongst the HEIs (Universities) in east of England and any short fall in funding will need to be met by the individual applicant.

Extra costs that the individual will be expected to meet include administration fees applied by HEIs and overseas student fees that may be applied.

NHSE EoE make payments directly to the HEIs; payments to individuals are not permitted.

Please note that NHSE EoE does not have a budget to pay any travel or subsistence expenses arising from undertaking Masters; therefore, no applications to NHSE EoE for travel or subsistence expenses in relation to this process will be considered.

NHSE EoE strongly advises applicants check the potential costs over and above the total bursary amount of £3,500 before applying to any particular HEI.

Places Allocation Explained

Bursary applications to East of England HEIs are preferred. The Higher Education Institutes (HEIs) for this application window (**September 2024**) are:

- University of Cambridge
- Anglia Ruskin University
- University of Buckingham
- University of East Anglia

- University of Hertfordshire

Applicants can only select the HEI where their PGDip has been completed. They will be asked to provide a supporting statement from their University Tutor.

Bursaries will be awarded in order based on each applicant's total application score.

The bursaries will be distributed in an even manner across the region, the number of places at each HEI will depend on the number of bursaries NHSE EoE are able to fund in any given application window.

If an applicant has an appointable score and all the bursaries in the HEI which they have preferred have been allocated to higher scoring applicants, they will be placed on a waiting list.

Feedback

Generic feedback will be provided to all applicants. Individual feedback will be provided upon request only. Feedback requests should be sent to england.mededbursaries.eoe@nhs.net, using subject line 'feedback request'. Please allow our team a couple of weeks to collate and send individual feedback.

Appeal Process

Applicants who are unhappy with their bursary outcome can appeal against the panel's decision. Appeals should be sent to england.mededbursaries.eoe@nhs.net; using subject line 'appeal'. Appeals must clearly outline the reason(s) for the appeal and include any evidence to support the appeal.

All bursary appeals will be forwarded to Associate Dean for Faculty Development. Requestors will receive a written response to their appeal. In some cases, we may offer a virtual meeting with the Associate Dean, where the applicant will have an opportunity to discuss their case. Please note that the Faculty Account Manager will attend these meetings to take notes. Notes from the meetings will be shared with the applicant and kept as an audit.

Application Data

Applicants' data will be kept in line with GDPR.
