Overview

This course provides instruction & hands-on practice in all methods of operative vaginal birth (both non-rotational & rotational) to facilitate the achievement of the OSAT competencies on the RCOG Training matrix. Techniques for performing a caesarean section at full dilatation are also covered. The course consists of short lectures which includes speakers from the NHS Litigation Authority, hands-on workshops on SimMom, the high fidelity simulator for practicing instrumental and caesarean delivery, one to one teaching, small group discussions on teamwork, communication & feedback.

The cost of the course is inclusive of the RCOG RoBUst course manual.

Places on this course are strictly limited to 12 delegates.

Why Attend?

- To develop your skills in performing operative vaginal birth, by tuition & hands-on practice
- To learn the technical & non-technical skills necessary to manage delay in the second stage of labour
- To facilitate the achievement of the relevant skills in the RCOG training matrix

Who Should Attend?

- Trainee levels ST1-ST3
- As Observers Foundation Year 1-2
