

Romit Samanta:

Romit is currently working as NIHR Clinical Lecturer in Intensive Care Medicine and Honorary Speciality Registrar in Anaesthesia and ICM.

Romit qualified from University of Cambridge and Imperial College School of Medicine. Following a year of critical care at the Prince of Wales Hospital in Sydney, Australia, he transferred to anaesthetic and intensive care training in the East of England. Romit completed his PhD investigating how we can use bioinformatics to better understand biology and develop new therapies for critically ill patients in 2021. He was appointed to an NIHR Clinical Lectureship. His research focuses on using mathematical techniques to detect the presence of endotypes within critical illness syndromes.
