

Volunteering with Team Up Jessica Lainchbury Project Lead

Introduction

- What is Team Up?
- Where did it come from?
- How does it work?
- What is being involved like?
- What are its benefits?
- What have been the challenges?
- What does the future hold?
- Team Up in East of England?

What is Team Up?

- HEE's London-wide, innovative volunteering programme
- Trainees and students volunteer to work in teams with community organisations on local health improvement projects

Aims:

- To broaden the educational experiences of trainees and students
- To promote multi-professional working
- To promote closer working between the NHS and community organisations
- To create sustainable health and wellbeing initiatives for a wide range of community organisations
- To improve the health and wellbeing of disadvantaged Londoners

2012 Olympic and Paralympic Games Legacy

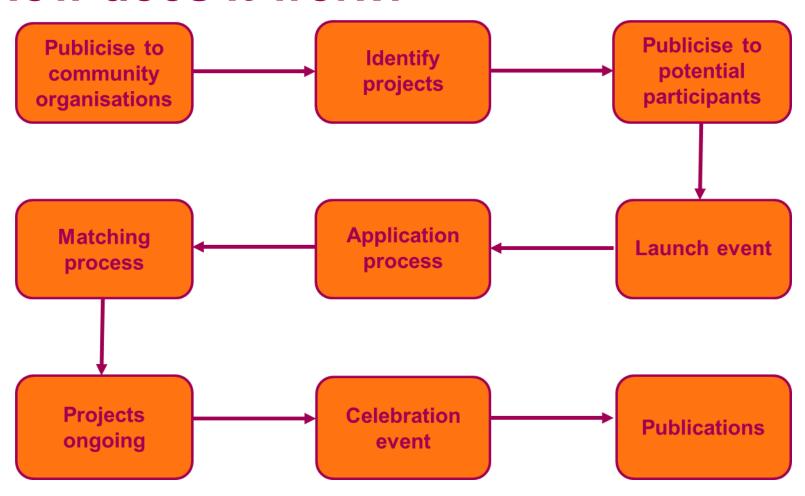

Official 'Inspired by 2012' initiative – innovative and exceptional projects inspired by Olympic and Paralympic Games

Multi-professional since 2014

How does it work?

Who takes part?

- Doctors
- Dentists
- Nurses
- Midwives
- Pharmacists
- Allied Health Professionals
- Public Health Registrars

Team Up projects

Creating legacies in community organisations

- The design of educational materials/courses/workshops
- Teaching/training of staff or clients
- Writing case studies of clients' experiences
- Evaluating an existing project or work-stream
- Preparing a needs assessment for a possible new service or funding application
- Helping clients access better statutory services or promoting/marketing the organisation
- Examples of projects at <u>www.lpmde.ac.uk/teamup</u>

Team Up video....

Benefits for volunteers

- Develop an understanding of population health and its determinants
- Develop teaching and leadership skills
- Gain technical skills
- Undertake training in project management and gain practical experience of managing small projects
- Work as part of a multi-disciplinary team
- Learn how to present work as a poster, produce publications and make the most of transferrable skills
- Work with community organisations to make a real difference to the lives of disadvantaged Londoners
- Opportunity to become a Team Up Mentor after completion of a project

Additional benefits of Team Up

For partner organisations:

- Stronger and more diverse network of volunteers
- Promotion of organisation and projects
- Sustainable projects for organisations to continue in the future

For the wider community:

- Increase trust between health professionals and vulnerable communities
- Engage 'hard to reach' communities
- Increase patient safety through promoting multi-professional working

Challenges

- Timing round to suit both students and trainees
- Availability and coordinating busy schedules
- Lack of leadership
- Low student uptake relative to trainees
- Retention
- Equal distribution of projects across London

The future for Team Up

- 2016/17: Bigger and Better
- Team up 'mentors'
- Involvement of medical students
- Volunteering opportunities on established Team Up project
- Non-medical postgraduate opportunities
- Training opportunities
- Truly London-wide
- National programme
